THE QEC DASHBOARD

The Dashboard utilises colour to display information at a glance. With each colour representing a different status.

QEC is fully integrated with *Concern* (the national problem gambler database) and *The Guardian* - facial recognition system for automatically identifying excluded players if they try and enter a gaming room

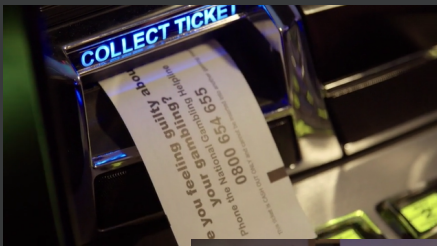

- **Green** indicates EGM is operating normally
- **Yellow** indicates a caution state (such as a machine door open)
- **Red** indicates an issue(such as a hopper refill or cancelled credit)
- **Purple** shows the machine is in play (and can show the EGM credit value)

Or visit our website at www.coms.net.nz

QEC is fully integrated with the JCM Ticket 2 Go CITO System.

Real Time Float Management

QEC float management accounts for all cash involved in the entire gaming operation and allows venues to produce a float report at the start, end or at any time during a shift.

QEC is fully integrated with EFTCO's Eftpos system.
