# The Guardian

A fully integrated, market-leading, cloud-based facial recognition system that identifies barred persons as they enter a gaming room, by matching them against images of barred persons stored in BOEN.

The Guardian is not just a FRT system, it's a full compliance solution for your gaming operation.

Approved by CBS. Solution Validated by Microsoft.
Selected by all Skycity Casinos

KEY BENEFITS

- **Reduced workload for your staff:**
  - » BOEN Images are displayed on The Guardian QEC Tablet installed in the Cashiers Area. This enables your staff to view the barred person information stored in Concern/BOEN to assist in the identification of a person who is barred from your gaming area directly from your cashiers area using their unique secure PIN.
  - » When a Barred Person is detected, the image of the person entering your gaming area is shown on the The Guardian QEC Tablet along side the source image from BOEN. No need for your staff to sign into BOEN to confirm the Barred Person's source image.
  - » The Guardian Automatically completes the 'Breach of Barring Form' when a detection is made. Your venue staff simply confirm the detection on The Guardian QEC Tablet, select the appropriate tick boxes on screen and enter any relevant comments. A secure link to download the completed report is emailed to venue management.

- **Highly reliable & proven system.** More than 100 systems installed in Hotels and Clubs. 100% customer satisfaction.

- **Industrial grade solution** – designed specifically for Gaming Room environments.

- **Tailored software** designed specifically to reduce false positives.

- **Custom designed wall-mount camera option available.** Minimises the intrusive look of a FR camera and provides the best FR results.

- **Easy to use**, full onsite training provided, backed by a 7 days per week telephone support team.

- **Technical support** provided by Amtek, or your preferred service company.
